ABSTRACT

This circular contains a selected bibliography of core literature in marine sciences and technology relevant to the work of the scientists in the Indo-Pacific region. The references are selected from an automatic computer search of the ASFA bibliographic database for the production period January 1981 - December 1984.

Introduction

At its second session, the Standing Committee on Resources Research and Development (SCORRAD) of the Indo-Pacific Fisheries Commission drew attention to the problems met by scientists in the IPFC Region (particularly in small institutes) of becoming aware of recent literature relevant to their work. FAO was asked to examine how the operation of the Aquatic Sciences and Fisheries Information System (ASFIS) could be used to assist the scientists in the IPFC Region. In response to that request a selected bibliography containing some 670 references was issued in 1981 as FAO Fisheries Circular (741).

This document contains a further 2394 references which were obtained from an automatic computerized search of the entries in the Aquatic Sciences and Fisheries Abstracts database for the production period January 1981/ December 1984, which covered the core IPFC area specifically for the countries Australia, Bangladesh, Burma, Kampuchea, New Caledonia, India, Indonesia, Malaysia, Pakistan, Philippines, Sri Lanka, Thailand, Vietnam. They are presented under the following general subject classification:

(a) Practical Aspects of Fisheries
(b) Aquaculture
(c) Fishable Stocks
(d) Aquatic Products and their Utilization
(e) Marketing and Economies of Aquatic Products

Those references which may cover more than one subject, appear under all relevant subject headings thus making each subject coverage a comprehensive one.

Requests for detailed subject searches from the ASFA database to meet specific user needs, and copies of this bibliography should be addressed to:
